

## New Technologies Provide Opportunities to Compete In A Challenging Economy

Minneapolis, Minnesota – May 6, 2009 Control Products, Inc., a trusted FSE leader in electronic control technology and global manufacturing, will be displaying a number of new products and technologies at the National Restaurant Association Show in Chicago, May 16-19, Booth #4933.

In recent years rising energy costs have had a major impact on operating costs for most businesses. Our **eCONSERVE™** technology can be embedded into your next control design to aggressively reduce equipment energy usage. This wireless technology links individual equipment with utility meters, allowing real time monitoring of building energy usage to initiate pre-programmed energy conservation control scheduling.

For many years we have assisted our customers in implementing **dtRED™** technology for measurement and sensing applications involving water level, ice thickness and moisture detection. In addition to this proven technology, we are pleased to introduce **DeltaTrac™** technology. DeltaTrac™ is an acoustical based technology that employs algorithms to track precise changes in equipment operation. DeltaTrac™ is a low cost, robust technology that senses, controls and provides feedback for a wide variety of applications. Applications include ice sensing within ice machines, equipment run cycle detection, monitoring of equipment wear, etc.

We are also proud to introduce our new **TC-9102** temperature and **HC-9100** humidity control families at NRA. The 9100 series provide single and dual stage temperature or humidity control, alarming and logging at a low cost. Applications include coolers, freezers, ovens, HVAC, etc. Custom modifications can also be created from this platform.

Additional technologies being promoted include a broad line of electronic display technologies (colored touch screen, dot matrix and LCD) and numerous wireless technologies (**ZigBee**, RFID and more). We look forward to assisting you with your next electronic controls solution whether it's in the US, Europe or Asia.

### About Control Products, Inc.

Since 1985, Control Products, Inc. has been a leader in electronic control solutions specializing in technology, design, embedded communications, Internet connectivity, and global manufacturing. Control Products owns and operates three manufacturing plants, Chanhassen Minnesota, Le Sueur Minnesota and Suzhou China. To learn more about all the devices and services offered by Control Products, Inc. visit us online at [www.controlproductsinc.com](http://www.controlproductsinc.com) or call 1-800-947-9098.
