Control Products Responds To Demand For Box Build Services.

Minneapolis, Minnesota – November 14, 2007 – Control Products, a trusted leader in electronic control technology is pleased to announce the expansion of its value added manufacturing services. Control Product's value added manufacturing includes assembling customer supplied component parts into subassemblies or finished goods. It also includes a variety of items such as displays, wire assemblies, plastic or metal enclosures. Additional value added services include functional testing, packaging and logistics.

Our U.S. plants and Suzhou China plant offer excellent resources for both low and high volume value added assembly. These services compliment our electronic design and automated manufacturing capabilities.

According to Chris Berghoff, President of Control Products, "As our customers continue to focus on their core competencies, outsourcing value added services allows them to allocate resources to the most cost efficient tasks. As a result they continue to improve their competitiveness."

For more information about how Control Products can provide you with complete turnkey services, call us at 1-800-947-9098.
